WHEREVER TIRES ARE CHANGED™

29975 - TPMS STEM REPAIR KIT

Repairs damaged valve stems like these:

*Easily repair damaged aluminum TPMS valve stems
Patented repair solution now available to the consumer*

reCORE®

TPMS Sensor Saver System

- Available to the professional, now made for DIY!
- Stems are damaged by corrosion from weather, steel valve caps, and improper valve cores.
- Without having to remove the wheel or demount the tire, consumers can “save” their TPMS sensors with this simple and economical repair kit.
- Repair 2 sensors for less than the cost of one replacement TPMS unit.
- Easy to use and very fast. Repairs can be completed in 20 minutes.
- **Patented** - this proven repair solution has been in the market since 2012 with millions of miles on repaired stems.
- Each kit includes: 2 replacement stems, custom high-speed drill bit, tap and tap holder, thread locker, and a valve core torque tool.
- The only additional tools needed are a high speed drill, needle nose pliers, and eye protection.
